

# RTF to TXT

Jinyi Luo

10/16/2019

Import Library striprtf

```
library(striprtf)
```

Set up folder Path and Output Path

```
folder_path <- "D:/Inputs"  
output_path <- "D:/Outputs/"
```

Print files, make sure path is set up correctly

```
files<-list.files(folder_path, pattern="\\.rtf$")  
files
```

```
## [1] "2017-01-19.rtf" "2017-02-16.rtf" "2017-03-16.rtf"
```

Use for loop to read each file, and output the same file name with txt extension.

```
for(file in files){  
  x <- read_rtf(file.path(folder_path,file))  
  y <- strip_rtf(x)  
  write(y,paste(output_path,sub("\\.rtf$", "", file), ".txt", sep=""))  
}
```
